"The extreme air blowing in the ballroom actually caused me to have a medical issue. I have Sjögrens and the constant air blowing caused me to have significant dry eye issues. It was more than just an uncomfortable temperature situation. It would have been preferred if all important details had been communicated more in advance. Most of the announcements came after I had already traveled to the area."

"Please try to not schedule during any spring breaks. Some had to lose vacation time."

"Check your personal bias against liberal arts education before speaking."
