## AGSC Subcommittee on Scores for Advanced Placement Tests

The subcommittee appointed to consider the standardization of AP Credits for all AGSC institutions have reviewed material from the College Board, from our own institutions, and from other Alabama higher education institutions. We offer the following connected recommendations for the full AGSC to consider.

1. Disciplinary experts at each institution should assess the appropriate threshold scores for AP exams in the same way that they assess courses for articulation.
2. AGSC recommends that all state institutions set AP score expectations at "3" for all courses as a means to smooth transfer between state institutions.
3. State institutions should clearly report their AP credit awarding thresholds in their institutional materials (web/bulletin/etc.) and AGSC will link to these scores or provide a composite table for easy reference.

The members of the subcommittee at the time this report was submitted:

Pamela Arrington (Alabama A&M)

Annette Cederholm (Snead State)

Timothy Edwards (West Alabama)

Charles Israel (Auburn, chair)
